

# Security Coaching for Project Managers

## Service Description

- designing security architecture,
- establishing trusted processes,
- performing feasibility tests,
- evaluating security products,
- planning implementation,
- selecting security vendors,
- reviewing configurations,
- monitoring operations,
- maintaining documentation,
- providing security trainings,
- running awareness campaigns.

## Scarce Resources

Project managers often lack time and resources for addressing security aspects during each and every phase of their project. As a result, last-minute repairs of security deficiencies stress the scarce project resources. Then it is too late for a careful and reasonable security conception.

Timely and professional management of security matters helps implementing effective security and keeping the project in time and in budget.

## Hassle-free Security Implementation

We assist moving the project to a point where it can be handed over to an operational unit without security concerns raised by security officers, users, customers, institutions or authorities.

We support project managers in handling information security matters in every project stage, allowing them to concentrate on their core management activities.

Applicable both to individual project phases or across the entire project, we help satisfying information security policies by a wealth of security tasks, including

- performing risk assessments,
- coordinating security activities,
- communicating risk status,
- analyzing security needs,
- specifying security requirements,
- developing security concepts,

## Expertise matters

Familiar with all facets of information security, including regulations, people and technology issues, we have helped bringing several large scale and complex projects to success.

## Optimized Time and Budget

Making use of Confidentas' substantial and up-to-date security expertise allows smart project managers stay focused on their core tasks and optimize their project resources. Security policies get implemented in an efficient and cost justified manner.

## About Confidentas

Confidentas helps organizations with elevated security and compliance requirements identify, assess and manage business risks related to confidentiality, integrity and availability of information.
